1 Introduction

In order to implement the GDPR correctly for "Enhanced Ecommerce Tracking" with the Google Tag Manager, some adjustments are required. You will find the necessary settings in this guide.

A prerequisite for these instructions is the use of the EU Cookie Policy Pro plugin.

<https://store.shopware.com/acris86961282733/eu-cookie-richtlinie-pro-automatischer-cookie-erkennung-sw6.html>

The Google Tag Manager can be integrated using the free plugin from Webmatch, for example - but this is neither mandatory nor a prerequisite for our plugin.

<https://store.shopware.com/wbm1713539203085f/google-tag-manager-google-analytics-enhanced-e-commerce-tracking-fuer-shopware-6.html>

2 Shopware administration area

Please make sure that the correct cookie is "active". (Screenshot is an example, depending on the Shopware version used or which EU cookie policy plugin version you are using).

The screenshot shows the 'Identifikation' section in the Shopware administration area. It contains a form with the following elements:

- Cookie-ID ***: A text input field with a placeholder text: `_ga|_gid|_gat_|_dc_gtm_UA-+|ga-disable-UA-+|__utm(a|b|c|d|t|v|x|z)|_gat|_swag_ga_*`. A blue question mark icon is visible in the top right corner of the field.
- Aktiv**: A toggle switch that is currently turned on (blue).
- Cookie Gruppe: ***: A dropdown menu with the selected option being 'Tracking'.

To do this, go to the admin of your Shopware Shop 6 and use the following path:
Settings > Plugins > EU Cookie Policy Pro > Cookies

You can find this cookie ID (Google Analytics) in the cookie plugin:

2.1.1 Cookie ID SW6 -> Plugin Version 2.5.0-2.6.1

`_ga|_gid|_gat_|_dc_gtm_UA-+|ga-disable-UA-+|__utm(a|b|c|d|t|v|x|z)|_gat|_swag_ga_*`

2.1.2 Cookie ID SW6 -> Plugin Version ab 2.7.0

`_ga|_gid|_gat_|_dc_gtm_UA-+|ga-disable-UA-+|__utm(a|b|c|d|t|v|x|z)|_gat|_swag_ga_*|_gac.*`

2.1.3 Cookie ID SW6 -> Plugin Version ab 3.1.0

`_ga|_gid|_gat_|_dc_gtm_UA-+|ga-disable-UA-+|__utm(a|b|c|d|t|v|x|z)|_gat|_swag_ga_*|_gac.*|_ga.*`

2.1.4 Google Consent Mode Cookie Configuration

In the Shopware 6 admin area, a new field has been added to the cookie management for each cookie: **Google Cookie Consent Mode**

Cookie settings
English
Cancel
Save

Script code

i The script code is executed when the cookie is accepted by the user. The script can be specified with the <script> tag or without. An external script (src attribute) can also be included. In addition, TWIG code can be entered and TWIG variables can be used.

Script code

Insert script

Script position

Google Cookie Consent Mode

Google Cookie Consent Mode

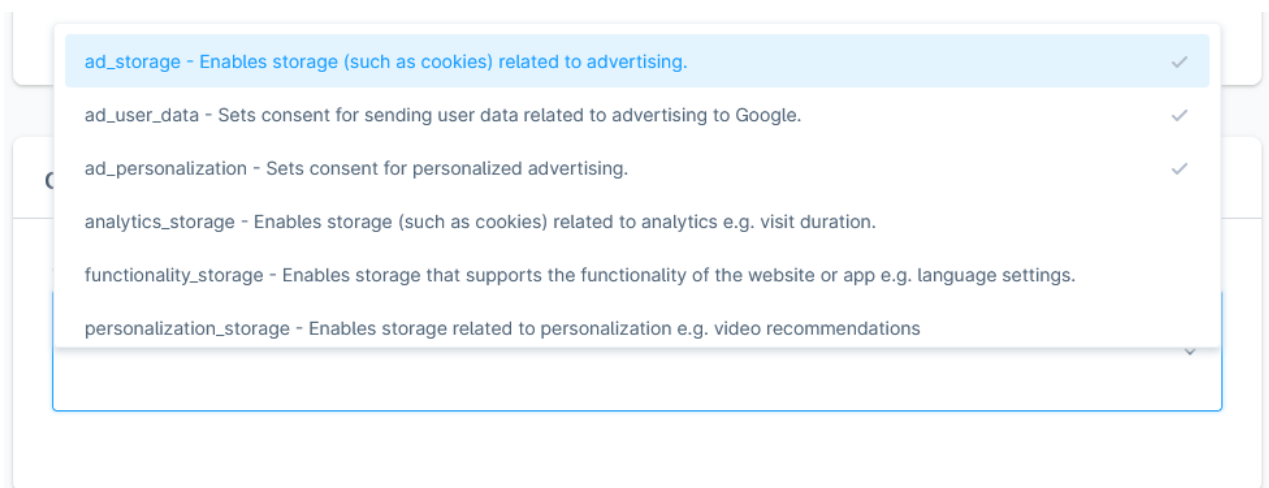

Select a Google Cookie Consent Mode

This field can be used to control which Google Consent Modes should be transferred to the Google Tag Manager when the cookie is accepted.

For the Google cookie entries already supplied by our plugin, the required consent modes are already set automatically when the cookies are automatically recognized or when the plugin is updated if these cookies already exist.

The following values are available for selection via the new setting (multiple selection):

ad_storage	Enables storage (such as cookies) related to advertising.
ad_user_data	Sets consent for sending user data related to advertising to Google.
ad_personalization	Sets consent for personalised advertising.
analytics_storage	Enables storage (such as cookies) related to analytics, e.g. visit duration.
functionality_storage	Enables storage that supports the functionality of the website or app, e.g. language settings.
personalization_storage	Enables storage related to personalisation, e.g. video recommendations
security_storage	Enables storage related to security, such as authentication functionality, fraud prevention and other user protection.

3 Setting up Google Consent Mode

3.1 Create required Variables

3.1.1 Create Variable: **ad_personalization**

Create new variable with name: ad_personalization

Variable type: Datenschichtvariable

Map Source 

Map ecommerce object automatically

Map Custom Definitions To Item Parameters

If your Enhanced Ecommerce object contains product-scoped custom dimensions/metrics, you can use this table to map those into GA4 item parameter names. Input the index number (if using the prescribed **dimensionXX** and **metricXX** syntax), or the name of the custom property (e.g. **productSize** or **stockCount**) in the first field. Input the parameter name with which the value should be sent to GA4 in the second.

4.1.6 Create Variable: ACRIS AddToCart

Create new variable with name: ACRIS AddToCart

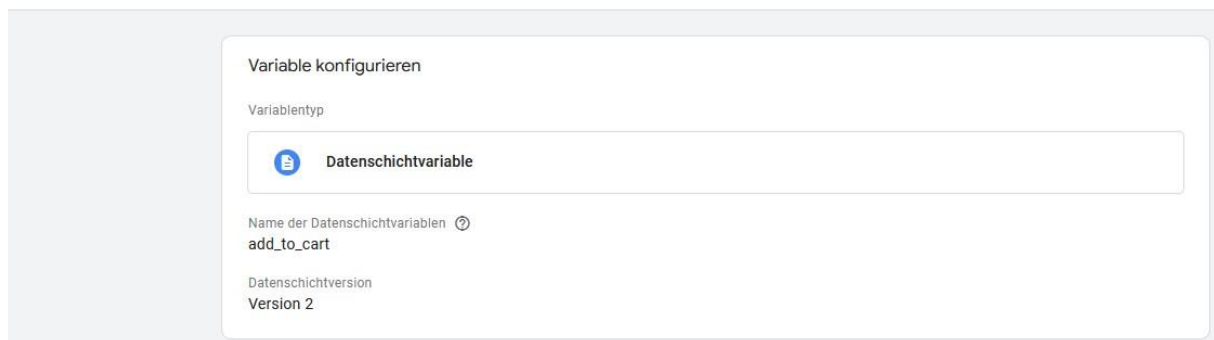

Variable type: Datalqayer variable

Datalayer variable name: add_to_cart

Datalayer version: Version 2

„Save“

ACRIS AddToCart 

The screenshot shows a configuration window titled 'Variable konfigurieren'. It contains the following fields:

Description

Unser Kundenservice Chat erfolgt auf Basis des Facebook Messengers. Hier können wir Dir im Chat helfen. Du kannst mit deinem Facebook-Profil (empfohlen) mit uns kommunizieren oder als Gast. Als Gast wird der Chat auf Facebook nach 24h gelöscht.

6.1.1.2 Google Tag Manager

Create a new Variable:

Name: FBMessenger_activated

Datalayer variable name: **acrisCookie.FBMessenger**

(see chapter **Error! Reference source could not be found.**)

(the name of the data layer variable preceded by **acrisCookie.** and the cookie name created in the Shopware backend)

Create a new Triggers:

Name FB Messenger activated (see chapter Error! Reference source could not be found.)

Trigger type: User-defined event

Event name: acrisCookieStateChanged

Trigger the trigger at: **FBMessenger_activated is true**

× FB Messenger aktiviert 

Triggerkonfiguration

Triggertyp

 Benutzerdefiniertes Ereignis

Ereignisname

acrisCookieStateChanged

Diesen Trigger auslösen bei:

FBMessenger_activated ist gleich true

Professional e-commerce solutions from Linz / Austria

ACRIS employs a number of specialists in the fields of e-commerce, multichannel sales and online marketing. The team of motivated and highly qualified experts has been able to build up and constantly expand its expertise in numerous e-commerce projects over more than 15 years.

Shopware is an important addition for ACRIS in the area of high-quality standard e-commerce systems.

If you are looking for a partner for intelligent, usability-optimized and process-controlled e-commerce systems, then ACRIS is the right partner for you.

The ACRIS service spectrum

With online stores, the focus is always on customer benefit and usability. ACRIS focuses on holistic e-commerce projects. During the design phase, the focus is on the optimum performance of complex product marketing.

The experience of the ACRIS team

In addition to Shopware, we also have experience in integrating numerous third-party systems such as Factfinder, Prudsys and various payment providers.

The competences

The certified project managers not only master the e-commerce area, but also the downstream processes and the connection to third-party systems such as CRM, merchandise management or shipping systems.

In addition, the ACRIS online marketing team masters the SEO optimization of online stores and websites, increasing the conversion rate and performance-oriented marketing.

References of ACRIS

Our customers from the B2C / B2B retail sectors are among the leading companies in their industries in Austria, Germany and Switzerland.
